

## WHEN THESE THINGS TAKE PLACE

### LARGE EARTHQUAKES ARE ROCKING ALONG “THE RING OF FIRE

May 11, 2020 by Michael Snyder

Within the past several days, large earthquakes have been striking all along the outer rim of the Pacific Ocean, and many are wondering if all of this activity could potentially be building up to something really big.

The **California** and **Alaska** coastlines have been absolutely peppered by quakes in recent days, but nobody is really talking about these quakes because everyone is so focused on COVID-19 right now.

Yes, this pandemic deserves our attention, but I would submit that all of the unusual shaking that has been happening certainly deserves our attention as well.

You may not have heard about it yet, but a magnitude 4.5 earthquake rocked **San Diego** on Sunday afternoon. According to the USGS. It had a depth of 10 kilometres or 6.2 miles. That is a rather large quake for that particular area, and it is just one of hundreds that have been hitting the region. In fact, CalTech says that there have been 1,227 earthquakes in **California** and **Nevada** over the last 7 days.

Meanwhile, the section of the Ring of Fire that runs along the west coast of South America has also been getting hit pretty hard. A magnitude 5.4 quake struck northern **Chile** on Sunday, and that really shook a lot of people up.

Subsequently, the portion of the Ring of Fire that runs along the coast of **Japan** was hit by a magnitude 5.8 earthquake very late on Sunday C...

The quake hit near the east coast of Honshu on Sunday. The earthquake was reported to have a depth of 80km. And that unusual event in **Japan** was very quickly followed by a magnitude 5.6 earthquake in Indonesia.

There has been so much shaking in Indonesia recently, but most people never hear about it. Just a few days ago, **Indonesia** was hit by a **magnitude 6.9 earthquake** that was so powerful that it was actually felt in Australia... (The tremor hit the Banda Sea, more than 600km north of Darwin, at a depth of 142km.)

So as you can see, there have been significant seismic events all over the Ring of Fire within the past several days. But it isn't just the Ring of Fire that has been shaking. Big earthquakes have been popping up in diverse places all over the globe, and the magnitude 5.1 quake that just hit Iran really surprised a lot of people...

A 5.1 magnitude earthquake hit **Iran** shortly after midnight on Thursday night with its epicentre 34 miles east of the capital city Tehran. AFP reported that panicked residents rushed into the streets, abandoning buildings in fear they would collapse. Two people were killed and 55 injured in the earthquake.

The earthquake was followed by eight more mild aftershocks. And weird earthquakes have been happening in the U.S. as well. In addition to the west coast I am always watching the New Madrid seismic zone very carefully.

So when two unusual earthquakes hit southern **Tennessee** on Sunday morning, it definitely got my attention... Two earthquakes were reported back to back in southern Tennessee early Sunday morning, officials say.

Without a doubt, there is a whole lot of shaking going on right now. We live in very strange times, and I have a feeling that they will soon get a whole lot stranger.

## **A CHRISLAM DAY OF PRAYER, FASTING AND CHARITABLE WORKS**

May 14: Chrislam day for peoples of all religions to pray to their gods, fast and do charitable works to end COVID-19 coronavirus....

MAY 12. Pope Francis announced that May 14 will be a **Chrislam Day of Prayer, Fasting and Charitable Works** to end COVID-19.

The initiative came from **The Higher Committee of Human Fraternity**, who proposes that everyone, **regardless of religion**, participate.

All through 2019, there has been story after story, of how Pope Francis actively began to build the One World Religion of Chrislam – a lead up to what we see in Revelation.

Chrislam combines the counterfeit Christianity of Roman Catholicism, Islam, and apostate Judaism, and it is called by various names. The Vatican calls it the **Abrahamic Faiths Initiative**, and it is governed by something called the **Higher Committee Of Human Fraternity**.

On **May 14th**, Pope Francis will be leading his One World Religion of Chrislam in global prayer to **the gods of this world**, and asking them to end COVID-19 on the earth.

Do you think the timing of Chrislam Day on May 14th is an accident or coincidence?  
It's the day in 1948, that God re-gathered the nation of Israel after 2,000 years?

The UN's Secretary-General, António Guterres, also **tweeted his support** for the "moment for reflection, hope and faith."

Pope Francis declared: "I accepted the proposal of the High Committee for the Human Fraternity, so **believers of all religions** will **spiritually** unite on May 14 in a day of prayer and fasting and works of charity, to implore God to help humanity overcome the coronavirus pandemic. "

This day is part of the Committee's task to share the message of the **Document on Human Fraternity for World Peace and Living Together**. The pope signed it in Abu Dhabi in February 2019 with the Grand Imam of Al-Azhar.

Now, more than a year after the signing of the Document, the members invite all religious leaders and people to ask God to bless and safeguard the world, so it will be better than before the pandemic. Which 'god' is anyone's guess?

Soon, and sadly, Pope Francis or the next Pontifex Maximus will be in control of Israel as he directs worship of the Antichrist and the Temple is rebuilt. This is what Chrislam was created to accomplish.

**"But when these things begin to take place,  
straighten up and lift up your heads,  
because your REDEMPTION IS DRAWING NEAR."**

**- Y'SHUA.** (Luke 21:28)
